

IDUNDUN MICHAEL DAMILARE

Web Developer & HTML5 Banner Developer

Lagos, Nigeria | +2348132946210 | idundunmd13@gmail.com | github.com/We13b-MD

Web Developer & HTML5 Banner Developer with experience building modern, responsive, and user-friendly web applications using React, TypeScript, JavaScript, HTML5, CSS3, Node.js, and Express.js. Passionate about creating clean, scalable solutions and integrating AI-assisted development workflows to improve productivity. Strong attention to detail, excellent communication skills, and committed to delivering high-quality software with a strong sense of urgency.

EXPERIENCE

New Tab, Lagos, Nigeria — Software Engineer

June 2024 - PRESENT

- Elevated Digital Tribe's creative output by producing interactive HTML5 rich media banners that drove higher engagement rates compared to standard static display ads.
- Reduced production turnaround time by establishing a structured workflow from brief receipt through final deployment across multiple simultaneous client campaigns.
- Strengthened client retention by delivering polished, brand-accurate rich media units for major FMCG brands including Nestlé, Jameson, and Indomie.
- Expanded the agency's rich media capabilities by introducing GSAP-powered animation techniques, enabling more complex and visually compelling ad experiences.
- Ensured 100% brand safety by deploying IAS (Integral Ad Science) tracking tags, Firewall skeleton frameworks, and viewability trackers across Outbrain, DV360, and CM360 served placements.
- Developed responsive and user-friendly web applications using modern frontend technologies (React, TypeScript, JavaScript).
- Built reusable React components, optimized application performance, and integrated REST APIs collaborating with designers and backend developers.

EDUCATION

National Open University of Nigeria (NOUN), Lagos, Nigeria

B.Sc Business Administration

Udemy Academy

Full Stack Web Development Certification

PROJECTS

Fake Bank Alert Detector (FBA Detector)

A React-based cybersecurity utility that simulates and analyzes bank transaction alerts, flagging phishing and fraud heuristics.

Employee Clocking System (MikiClock)

An automated attendance and productivity SaaS dashboard tracking employee shifts, breaks, and CSV reports.

Conference Ticket Generator

A dynamic, high-fidelity ticket generation application with drag-and-drop avatar uploads and instant PDF downloads.
